**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 5 **change** "potion" **to** "portion".

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks, filed 30 June 2008, with respect to the prior art rejections of the claims have been fully considered and are persuasive. The prior art rejections of the claims have been withdrawn. Further, an Examiner's Amendment is submitted above to correct what is clearly a simple clerical error in claim 1.

### ***Allowable Subject Matter***

2. Claims 1-10, 12-15, 17-30, 32-35, 37, 38 and 40-43 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a device for capturing and printing image data. The device has a user interface that allows a user to select one of a plurality of capture-to functions. Based on the selection, the image capturer of the device captures a particular portion of an original image. The size, shape or intensity, as well as the particular portion that is captured, is based on the selection of the capture-to function. Then, the captured first image is printed as the background layer in the printed copy. This particular device is advantageous since the device can automatically determine a portion of the original image to use as a printed background image based on the capture-to function, such as capture-to watermark, capture-to header/footer, and so on. The particularly desired use of the captured portion determines what portion is captured and how the portion is captured and used as a background image.

Presently amended independent claim 1 is not taught by the previously cited combination of references Dotsubo (US-6,556,243 B1) and Schinner (US-2004/0218206 A1). Particularly, the combination of references does not teach that a background image is captured from only a portion of the original image, the portion being determined by the capture-to function selected by the user. Further, Examiner has not discovered the particular combination of features recited in claim 1 in the prior art, either in a single reference or in an obvious combination of references. Accordingly, claim 1 is deemed allowable over the prior art.

Claims 2-10, 12-15, 17-20 and 41 all depend from claim 1, either directly or indirectly. Thus, said claims are also deemed allowable over the prior art at least due to their respective dependencies from allowable claim 1.

Art Unit: 2625

Independent claim 21 is a method for capturing and printing image data, including the background layer of an image. Claim 21 embodies similar features as claim 1, including the features deemed allowable over the prior art. Therefore, claim 21 is deemed allowable for reasons similar to those given for claim 1.

Claims 22-30, 32-35, 37, 38 and 40 all depend from claim 21, either directly or indirectly. Thus, said claims are also deemed allowable over the prior art at least due to their respective dependencies from allowable claim 21.

Independent claim 42 is a simpler method than claim 21. However, claim 42 contains all of the features found in claims 1 and 21 that are deemed allowable over the prior art. Therefore claim 42 is deemed allowable over the prior art for reasons similar to those given for claims 1 and 21.

Claim 43 depends from claim 42 and is therefore deemed allowable over the prior art at least due to its dependency from allowable claim 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
